Monthly update

Portfolio activity¹

New/increased exposures: 7

Exited/reduced exposures: 12

For July, the monthly net performance (change in NTA plus distributions made) per unit was 2.67%. PGG continues to distribute its distribution target of RBA +4% per annum.

In July, the Underlying Fund added four new companies directly to its portfolio across the industrials, consumer goods and consumer staples sectors, and increased its exposure to three existing companies in which we hold strong credit conviction. Meanwhile, the Underlying Fund reduced its exposure in five companies and exited its exposure in seven companies due to a combination of there being relatively more attractive opportunities and refinancing activity. During the month, the concentration of the largest 10 companies increased from 8.6% to 9.3%. Software remains the largest sector at 13%, followed by Health Care Providers & Services at 10%. As of July, the Portfolio continues to be fully deployed.

Market activity

After the steep losses suffered in June, risk assets rebounded strongly in July and posted positive returns across the board. The rally was underpinned primarily by technicals more than fundamentals, including in particular a lack of primary issuance, heavy CLO origination (especially in Europe) and the largest retail inflows since June 2020 in High Yield. Over the month of July, the US S&P Leveraged Loan Index (LLI) increased by 2.1% while the European Leveraged Loan Index (ELLI) increased by 2.6%.

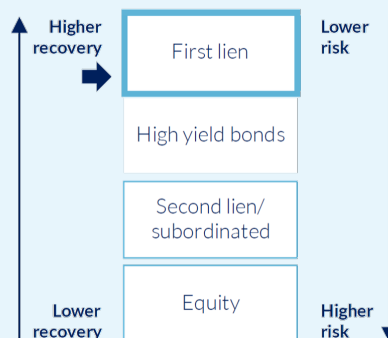

In July, the average price of the U.S. Loan Market increased from 92.16 to 93.64, and the 3-year discounted spread tightened by 63bps to end the month at 592bps. In Europe, the average price rose from 89.51 to 91.52, and the 3 year-discounted spread ended the month at 712bps (-108bps).

Portfolio strategy¹

The investment objective is to provide monthly income through exposure to a diversified pool of global private debt investments.

The investment strategy is to access a diversified portfolio of private debt investments through active origination, portfolio construction and risk management. The strategy will be implemented by dynamically allocating investments across the following three distinct private debt strategies:

- The First Lien loan strategy, representing 60-100%
- The Second Lien and Subordinated loan strategy, representing 0-20%
- The Special Situations strategy, representing 0-25%
